DETAILED ACTION

1. Claims 1-23 are currently pending.

Election/Restrictions

2. Applicant's election with traverse of Group XII, claim 18, in the reply filed on July 14, 2009 is acknowledged. The traversal is on the ground(s) that it would not be an undue burden to search and examine all of the claims. This is not found persuasive because establishment of burden is not required for applications restricted based on lack of unity. In addition, if it were required to establish a search and examination burden, the fact that applicant has claims drawn to 19 distinct inventions clearly underscores that a search and examination burden exists.

The requirement is still deemed proper and is therefore made FINAL.

3. Claims 1-17 and 19-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.
4. Claim 18 is examined on the merits.

Claim Objections

5. Claim 18 is objected to because it depends from non-elected claim 2. If claim 2 were cancelled, this would necessitate 112 2nd rejections. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1655

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 18 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 18 is indefinite in that it depends on non-elected claim 2 which contains indefinite language. Because claim 18 depends on claim 2, claim 2 has been examined only to the extent to determine if claim 2 is definite. Claim 2 is considered to be indefinite because the Markush language used in the claim is unclear. The claim state that the composition is "selected from the group consisting of fruit or fruit juice of amla and an extract thereof." The use of "and" in combination with "or" creates confusion as to the actual scope of the Markush group. It is unclear if the extract is an extract from the fruit or the fruit juice or both. Clarification is needed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 18 is rejected under 35 U.S.C. 102(b) as being anticipated by Bordia (Indian Heart Journal (1985), vol. 37, no. 3, pp. 179-182).

The reference teaches using amla juice and amla fruit pulp to inhibit atherosclerosis. The reference teaches that the amla products are high in vitamin C and that vitamin C enhances fibrinolytic activity (see page 181). Enhanced fibrinolysis would lead to an inhibition in fibrin

formation. Thus, the reference teaches a method of inhibiting fibrin formation using fruit and fruit juice from amla.

8. No claims are allowed.
